EXECUTIVE SUMMARY

Political and economic analysts tell us that there are many UK businesses who have been sheltering from the rain since the economic collapse in 2008 and the subsequent economic and political uncertainty which has followed but, more interestingly, there are many more who have actually been dancing in it (or at least learning to do so). They go on to say that it would seem that the world inhabited by the owner managed business in the last year or so here in the UK has, to a greater extent, weathered the storm and is looking ahead with a certain degree of optimism even in the face of a soggy European exit.

We have experienced a similarly wide variety of commercial weather fronts with our clients during this period. Our client base, though predominantly situated in London and the south, has outposts nationally and overseas. The character and strategic objectives of our clients ranges from start-up to mature companies and the industry sectors in which they operate are somewhat diverse. We have found that for some it has been a rollercoaster ride off the back of innovation and technological advancement, for others it has been steady expansion based on a good product, expanding markets, good management and good people. For many it has been reliance on or benefit from debt and equity investments and, for a few, it has been a scrappy and difficult street fight.

In an attempt to give a little more colour to the legal advisory service we offer, we would like to introduce a selection of recent projects we have undertaken for our clients, both in the transaction and commercial space.

I hope they are of interest and please do feel free to contact us should you like to explore the possibility of us being able to assist you with your own short term commercial objectives or longer term corporate strategy.
